SUMMARY

Data analytics professional with production experience building BI infrastructure and data pipelines across healthcare and revenue management. Deployed NLP classifiers, Fabric architectures, and GA4 systems to automate reporting at scale.

EDUCATION

Bachelor of Science in Data Analytics

Missouri State University. GPA: 3.93/4.0

May 2026

Springfield, MO

EXPERIENCE

Intern – Enterprise Data & Analytics

June 2026 – Present

CoxHealth

Springfield, MO

- Build a Wrike API data pipeline into Microsoft Fabric's Silver-layer medallion architecture, automating ingestion of project and task completion data to support structured, team-wide reporting workflows
- Design a Power BI semantic model tracking project timelines and task completion metrics for the Enterprise Data team
- Refine schema granularity toward Gold-layer standards, producing AI-queryable data assets that enable natural language Q&A over project and task data across the Enterprise Data & Analytics team

Analyst & Revenue Management Associate

June 2026 – Present

Nightly

Springfield, MO

- Track short-term rental KPIs (Occupancy, ADR, RevPAR) to surface gaps and opportunities across the portfolio
- Analyze booking trends and forecasts to inform dynamic pricing recommendations across 70+ properties in 5 states
- Standardize data collection, cleaning, and validation workflows across reservation and operations systems, documenting repeatable processes to improve cross-team data reliability

Data Intern

February 2026 – May 2026

Nightly

Springfield, MO

- Built end-to-end conversion tracking infrastructure using Google Tag Manager and GA4, enabling attribution of qualified property owner leads through a full-funnel search campaign with custom keyword architecture
- Engineered automated lead routing and follow-up workflows across GoHighLevel and Vintory via webhook integrations, incorporating A2P 10DLC SMS compliance and Meta Ads pipeline logic to reduce manual handoff time
- Developed a Notion API-integrated team performance dashboard, displaying real-time goal progress across 8 coworkers

Intern – Enterprise Data & Analytics

June 2025 – August 2025

CoxHealth

Springfield, MO

- Automated triage of 11M+ patient messages via Python NLP classifier (99% accuracy), cutting manual overhead and accelerating scheduling operations
- Developed a self-service Power BI model by integrating SQL queries, Microsoft Fabric, and DAX, reducing ad-hoc reporting requests to the data team
- Queried complex datasets in Microsoft Fabric's Lakehouse using SQL, leveraging Bronze/Silver/Gold medallion layers and ERD schemas to structure Star schema models with optimized joins and validated relationships

TECHNICAL SKILLS

Languages: SQL, Python, R, DAX

Data Engineering & Cloud: Microsoft Fabric, Apache Spark (PySpark), GTM, GA4

Analytics & BI: Microsoft Excel, Scikit-learn, Pandas, NumPy, Plotly, Power BI, Tableau, Tabular Editor

CRM & Ads: Google Ads, Meta Ads, GoHighLevel, HubSpot

PROJECTS

Business Analytics Case Competition | R, Tidyverse, Python, NumPy

February 2025 – May 2026

- Generated descriptive statistics and visualizations (box plots, histograms, summary tables) to uncover key insights
- Performed exploratory data analysis (EDA) and correlation analysis to identify relationships between economic and demographic variables and the Student Aid Index outcome

NBA Schedule Difficulty Analysis | Python, Pandas, NumPy, Plotly

August 2025

- Designed a custom framework using Python to analyze how schedule density, travel, and back-to-backs influence win-loss outcomes, bridging technical rigor with front-office decision support across all 30 NBA teams
- Built dashboards that visualize competitive imbalances in schedule strength, using OKC Thunder as a case study

LEADERSHIP EXPERIENCE

Student Career Ambassador

August 2025 – December 2025

Career Center - Missouri State University

Springfield, MO

- Strengthened career readiness by delivering personalized feedback on 15 student resumes weekly
- Empowered students on effectively showcasing job skills and experiences, earning a 4.86/5.0 satisfaction rating

Men's Basketball Player

August 2022 – May 2024

North Arkansas College

Harrison, AR

- Participated in North Arkansas' Men's Basketball team; NJCAA Region 2; Division II
- Awarded the NJCAA All-Academic First Team 2023–24
