SUMMARY

Data analytics graduate (2026) with internship experience covering BI infrastructure at a health system and marketing analytics in a high-growth startup. Built production systems across SQL, Python, GTM, and GA4.

EDUCATION

Bachelor of Science in Data Analytics

May 2026

Missouri State University. GPA: 3.93/4.0

Springfield, MO

- Relevant Coursework: Machine Learning, Data Mining, Advanced Data Management & Integration

EXPERIENCE

Data Intern

February 2026 – May 2026

Nightly

Springfield, MO

- Built end-to-end conversion tracking infrastructure using Google Tag Manager and GA4, enabling attribution of qualified property owner leads through a full-funnel search campaign with custom keyword architecture and negative keyword strategy
- Engineered automated lead routing and follow-up workflows across GoHighLevel and Vintory via webhook integrations, incorporating A2P 10DLC SMS compliance and Meta Ads pipeline logic to reduce manual handoff time
- Developed a React and Notion API-integrated team performance dashboard that replaced a manual tracking process, surfacing real-time progress on quarterly goals across 6 coworkers

Intern – Enterprise Data & Analytics

June 2025 – August 2025

CoxHealth

Springfield, MO

- Developed a self-service Power BI model by integrating SQL queries, Microsoft Fabric, and DAX, reducing ad-hoc reporting requests to the data team
- Queried complex datasets in Microsoft Fabric's Lakehouse using SQL, leveraging Bronze/Silver/Gold medallion layers and ERD schemas to structure Star schema models with optimized joins and validated relationships
- Leveraged AI tools to expedite DAX measure development and optimize model performance

PROJECTS

Business Analytics Case Competition | R, Tidyverse, Python, NumPy

February 2025 – Present

- Develop an ongoing case study through the Association of Business Information Technology Students (A-BITS)
- Generate descriptive statistics and visualizations (box plots, histograms, summary tables) to uncover key insights
- Perform exploratory data analysis (EDA) and correlation analysis to identify relationships between economic and demographic variables and the Student Aid Index outcome

NBA Schedule Difficulty Analysis | Python, Pandas, NumPy, Plotly

August 2025

- Designed a custom analytics framework to measure how schedule density, travel, and back-to-backs influence win-loss outcomes across all 30 NBA teams
- Built interactive dashboards with Plotly that visualize competitive imbalances in schedule strength, spotlighting the Oklahoma City Thunder as a case study
- Blended statistical analysis with basketball context to produce insights that mimic front-office decision support, bridging technical rigor with real-game narratives

TECHNICAL SKILLS

Languages: SQL, Python, R, DAX

Data Engineering & Cloud: Microsoft Fabric, Apache Spark (PySpark), GTM, GA4

Analytics & BI: Scikit-learn, Pandas, NumPy, Plotly, Power BI, Tabular Editor, React

CRM & Ads: Google Ads, Meta Ads, GoHighLevel, HubSpot

LEADERSHIP EXPERIENCE

Student Career Ambassador

August 2025 – December 2025

Missouri State University Career Center

Springfield, MO

- Strengthened career readiness by delivering personalized feedback on 15 student resumes weekly
- Empowered students through one-on-one consultations with strategies to showcase skills and experiences effectively to employers, earning an overall satisfaction rating of 4.86/5.0

Men's Basketball Player

August 2022 – May 2024

North Arkansas College

Harrison, AR

- Participated in North Arkansas' Men's Basketball team; NJCAA Region 2; Division II
- Awarded the NJCAA All-Academic First Team 2023-24
